SUMMARY

Final-year Software Engineering student (GPA 3.87) with a full-year automation internship at **Teleperformance Malaysia** — where projects across HR, Finance, GTM, Recruiting, and Operations delivered over **\$300K in measured ROI** and reached users from talent-acquisition teams up to regional CEOs across seven countries. Strong full-stack and mobile background (Next.js, Flutter, Supabase, Power Platform) with proven end-to-end ownership: requirements gathering, system design, secure data architecture, and deployment.

EDUCATION

Universiti Teknologi Malaysia (UTM)

2022 – 2026

Bachelor of Software Engineering

Johor, Malaysia

- **GPA: 3.87 / 4.00** — Final year
- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Software Engineering, Software Design & Architecture, Operating Systems, Artificial Intelligence, Computational Intelligence

EXPERIENCE

Teleperformance Malaysia

2025 – 2026

Automation Developer (Full-Year Internship)

Kuala Lumpur, Malaysia

- Designed, built, and shipped enterprise automation solutions across **HR, Finance, Global Talent Mobility, Recruiting, and Operations** — combined business impact exceeded **\$300K in ROI**.
- **Hiring Request Management System** — company's first centralized hiring workflow (Power Apps, Power Automate, SharePoint) with AI screening; deployed across **6 countries**, used by talent teams up to the **regional CEO**. End-to-end ownership: requirements, design, rollout, training.
- **Promotion Management System** — end-to-end automation of the company-wide promotion workflow: multi-level approval routing, automated reminders, and auto-generated promotion letters on final approval.
- **Global Talent Mobility (GTM) Platform** — replaced Excel/email processes with a Next.js + Power Automate + SharePoint system; Power Apps console for ticket handling, KPI dashboards, and reassignment. Covers employment-pass, visa, and verification workflows.
- **Finance Reimbursement Automation** — Next.js intake form → manager approval → multi-level Power Apps review → finance system submission, eliminating manual spreadsheet handling.
- **Client Event Management System** — Power Platform application for a client, using AI to analyze event performance and auto-generate reports.
- Built custom AI agents in **Microsoft Copilot Studio** trained on department-specific knowledge bases, reducing repetitive queries to HR and Operations teams.

PROJECTS

Yalla-Fitness — Full-Stack Fitness Platform (Final-Year Project) | 2026

Flutter, BLoC, Clean Architecture, Supabase, Next.js, TypeScript, Tailwind CSS

- Built a cross-platform fitness platform using Flutter with BLoC and Clean Architecture, backed by Supabase (Auth, Postgres, Storage, Edge Functions).
- Implemented onboarding, calorie and body-metric calculations, workout scheduling, nutrition tracking with barcode scanning, goal tracking, Google Fit/Health Connect syncing, and Spotify integration.
- Developed an AI fitness coach powered by an LLM through Supabase Edge Functions to secure API keys and manage server-side conversation memory.

- Created a Next.js admin dashboard with role-based access and CMS features for workouts, exercises, supplements, and educational content with live mobile preview.
- Improved backend security and data integrity using row-level security policies, triggers, and audit logging.

EduSync — Resource Sharing & Management Platform

2024

Next.js, Express.js, MongoDB, Tailwind CSS

- Full-stack platform for sharing course materials, Google Drive links, and managing academic tasks, with role-based access for admins, lecturers, and students.

Cook&Go — Food Delivery Platform

2025

Next.js, Firebase, Tailwind CSS, Vercel

- Full-stack ordering platform with admin dashboard analytics, user and order management, and a customer-facing menu and order flow. Deployed on Vercel.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Dart, C++, Java, PHP, SQL, HTML, CSS

Frameworks & Libraries: Next.js, React, Express.js, Flutter (BLoC, Clean Architecture), Tailwind CSS

Backend & Databases: Supabase (Postgres, Edge Functions, RLS, Storage), MongoDB, Firebase, SharePoint, SQL

Microsoft Power Platform: Power Apps, Power Automate, Power Automate Desktop, Copilot Studio

Tools & Practices: Git, RESTful APIs, CI/CD, Vercel, Figma, audit logging, row-level security, third-party API integration (Spotify, LLM services, Google Fit / Health Connect)

Interests: Software architecture, AI/ML, automation, secure system design

LEADERSHIP & VOLUNTEERING

Yemeni Student Academic Group (YSAG) — Head of Computing

2023 – 2024

Arabic Culture Day (ACD) — Country Representative & Director of Performance

2024

LANGUAGES

English (Professional proficiency) • Arabic (Native / Professional proficiency)
